PROJECT-2

DEADLINE: 16.12.2022

Implement <u>shift-reduce algorithm</u> by using **C/C++** or **Python** programming language for the grammar and parsing table given below.

- 1. $\mathbf{E} \rightarrow \mathbf{E} + \mathbf{T}$
- 2. $\mathbf{E} \rightarrow \mathbf{T}$
- 3. $T \rightarrow T * F$
- 4. **T → F**
- 5. $\mathbf{F} \rightarrow (\mathbf{E})$
- 6. $\mathbf{F} \rightarrow \mathbf{id}$

Your program should work as follows:

>>Enter your string:

>> id**id

>> INVALID string entered. SYNTAX ERROR!

>>Enter your string:

>> id+id

>> VALID string entered. ACCEPTED!

DO NOT FORGET THAT THIS IS NOT A TEAMWORK!
